

## STATEMENT OF PURPOSE:

I believe that the best way to predict your future is to create it. Myself **Hemant Yadav**, I did my matriculation from Board of High School and Intermediate Education U.P. in year 2020 and in year 2022 my secondary education from the same board. Intrigued by the vast career prospects, innumerable opportunities to work across sectors, and a chance to build strong business acumen, I had planned to pursue Bachelor of Business Administration.

After rigorous research for right educational institution to hone my educational attainments I zeroed down **Lincoln University** as my future institute. It is one of the most affordable private education institutions in the Bay Area .University plays a vital role in students' life by providing an educational setting where they can foster quality education. The diversity of cultural backgrounds on campus exposes to life stories from all over the world, enhances students' social skills, and presents a great opportunity for personal growth. The program at university encompasses theories blended with real-life applications. One of the advantage students have is of small-classes as it allows faculty members and staff to advice and mentor every student. Professors are well experienced and fully equipped with resources to provide students with quality education. Students with good academic records are eligible to apply for discounts and scholarships; this indeed will motivate them to perform better. Lincoln University is authorized under Federal law to enrol non-immigrant students.

I always wanted to pursue a course related to my previous study, So after exploring a lot about the courses available in the university related to mechanical field, I selected **Bachelors of Business Administration**. The degree will help me to quickly obtain the best positions in the competitive field of mechanical engineering. This field offers stable careers with job opportunities growing at about an excellent rate when compared to other industries.

**American institutions** are also known to have high academic standards, follow rigorous practices to maintain quality and are well- supported to be able to offer excellent education to its students. The country understands the struggles of international students, therefore conduct regular orientation programs, workshops and trainings to offer assistance. They provide international students with the opportunity to work alongside their studies to fund their stay and studies in the States. It is a melting pot of different cultures, races, and ethnicities. It has diverse environment ensures that there is acceptance among all communities and there is no room for any discrimination. These were the reasons behind my choice of the United States of America as study destination than other countries.

I will apply the knowledge I gained during the journey of the course to the benefit of the organisation I will be working with. The skills and knowledge I will receive will surely change my way of working towards a particular goal.

Regards

Hemant Yadav
