

There is no elevator to success; you have to take the stairs. I, Harsimranjit Kaur hail from Punjab, India, completed my matriculation in year **2020** and senior secondary in **2022** from Punjab School Education Board. To take my career nearer to ladder of success, I made up my mind of pursuing my Bachelors' degree from Lincoln University, in the United States of America. As per my area of interest i shortlisted **Bachelors in Business administration and Management** among other courses offered by this university.

After scrutinizing various universities I narrowed Lincoln University as my future institution for my graduation studies. One of the prime reasons was because it is one of the most affordable private education institutions in the Bay Area. The University places its focus on practical education with strong international character. University provides its students with educational setting where they can foster quality education. The diversity of cultural backgrounds on campus exposes to life stories from all over the world, enhances students 'social skills, and presents a great opportunity for personal growth. . One of the advantage students have is of small-classes as it allows faculty members and staff to advice and mentor every student. Professors are well experienced and fully equipped with resources to provide students with quality education. Students with good academic records are eligible to apply for discounts and scholarships; this indeed will motivate them to perform better. Lincoln University is authorized under Federal law to enrol non-immigrant students.

The program will equip me with critical thinking skills, data analysis tools, and the art of effective communications to help me make wise decisions for future organization I will work with. This program provides an integrated business education, focusing on equipping me with a solid foundation in functional areas of a modern commercial enterprise crucial for the challenges and responsibilities of today's business world. There are various concentrations to choose from them I chose **Management**; I will be studying courses like business foundation, management principles, international business, legal foundations of business, Quantitative analysis and many more. The degree will help me to quickly obtain the best positions in the competitive field of

mechanical engineering. This field offers stable careers with job opportunities growing at about an excellent rate when compared to other industries.

I chose this destination as U.S. universities welcome international students to study in the USA and offers a support system within the university which enable them to adjust to the changing life. It also has many immigrant friendly rules for students from the globe, such as it allows them to work along with their studies to fund their education and manage their stay in the United States. The experience builds critical thinking skills, develops self-confidence and cross cultural skills and all these attributes are highly valued by the employers around the world. The U.S. education system has a lot to offer me. The program structures in the country lay equal emphasis on building a strong theoretical base along with importance on practical, employment-related skills.

After completing this degree, I have already planned that what I have to do with the degree. I am confident that this field of study will fulfill all these things, because success in this field means succeeding in achieving my dreams.

Regards

Harsimranjit Kaur
