

I am Harshit Chopra, from Haryana, India. My academic attainments include Matriculation in the year 2014 from Central Board of Secondary Education and Senior Secondary Education in the year 2016 from the same Board. Further I did Bachelor of Commerce from University of Delhi in the year 2019. Now I have decided to pursue Masters from the United States of America. I started with my research about the relevant courses according to my field of interest. And after extensive thought and research, I decided to gain Master degree from Lincoln University in California State.

I choose Lincoln University as it is a well-established, private university which is highly ranked & globally known. The university is dedicated to excellence in teaching, scholarship and its services. The most experienced faculty and staff will help me to be prepared globally through programs grounded according to my preference. The university offer a comprehensive, values-centered learning experience that focuses faith, leadership, inclusiveness and social responsibility. Going to a university like LU will prepare me to start a new career and live a life full of possibilities of employment in my home country.

The degree in Management will help me develop a sound understanding of business practice, as well as ethical principles of management necessary for a professional career in this field. It will help me think analytically, understand business processes, and strengthen my ability to work in a professional setting. After completing this course I can secure valuable career opportunities in positions including manager or I can also work with agencies or firms. I can become a successful Entrepreneur.

I chose this destination as U.S universities have an excellent education system and ranks among the best in the world. It welcomes international students to study in the USA and offers a support system within the university which enables them to adjust to the changing life. It also has many immigrant friendly rules for students from the globe, such as it allows them to work along with their studies to fund their education and manage their stay in the United States. The experience builds critical thinking skills, develops self-confidence and cross cultural skills and all these attributes are highly valued by employers around the world.

The U.S. education system has a lot to offer. The program structures in the country lays equal emphasis on building a strong theoretical base along with importance on practical, employment-related skills.

I would be highly obliged if you consider my application and allow me to join your esteemed university.

Regards

Harshit Chopra
