

PERSONAL STATEMENT:

“The first step toward success is taken when you refuse to be a captive of the environment in which you first find yourself.”

Myself **Bhavdeep Singh**, I did my matriculation in year 2016 from Central Board of Secondary Education and senior secondary in year 2019 from the same board. I wanted to have quality education which would further help me become an independent professionally.

After scrutinizing various universities I narrowed **Lincoln University** as my future institution for my graduation studies. It is a private non-profit non-secretarial university in San Francisco. The university placed its focus on practical education with strong international character. It offers a curriculum of outstanding Business Administration programs with special emphasis to Master of Business Administration degree with a variety of concentration areas. LU provides students with educational setting where they can foster quality education, good citizenship, personal involvement, and contribution to the world community. The diversity of cultural backgrounds on campus exposes to life stories from all over the world, enhances students 'social skills, and presents a great opportunity for personal growth.

As per my field of interest I decided upon **Bachelor Business Administration program**. With this program I will develop advanced analytical skills using tools and techniques from the quantitative and behavioral sciences. The main emphasis of the program will be on decision making in dynamic environments and synergies between various functional areas.

I chose this country among many other developed countries as U.S universities welcomes international students to study in **USA** and offers a support system within the university which enable them to adjust to the changing life. It also has many immigrant friendly rules for students from the globe, such as it allows them to work along with their studies to fund their education and manage their stay in the United States. The experience builds critical thinking skills, develops self-confidence and cross cultural skills and all these attributes are highly valued by the employers around the world. The U.S. education system has lot to offer me.

I am confident that studying in Lincoln University will empower me with sound knowledge of basic principle of this field and help me acquire required skills to reach my goals.

Regards

Bhavdeep Singh
