ESSAY

Share an essay on any topic of your choice. It can be one you've already written, one that responds to a different prompt, or one of your own design.

Dear Concern,

Myself khushpreet kaur, a resident of Punjab a land of diverse cultures in INDIA. As far as my academics are concerned; I have completed my Matriculation in year 2017 and senior secondary in year 2019 both from central board of secondary education. To upgrade my academics

A keen observer and an avid learner is how I describe myself. Since my childhood I have been inquisitive about learning biological sciences. I firmly believe that the portals to knowledge and excellence are never completely filled; there is always some scope for more. This has been my motivation to pursue my graduation in the field of BS Biology. Biological Sciences is a different world in itself. Biology is classified as a scientific study of life. It is the division of natural science that examines various aspects of vital processes. The concept includes anatomy, physiology, cell biology, biochemistry and biophysics, and covers all organisms from microorganisms, animals to plants. A Biological Sciences degree provides one the ability to explore the nature of life while expanding skills, with the potential to go into many career areas. Biologists study life at various levels, from the tiniest of cells, and organisms to entire ecosystems. Studying biology promises students an exciting and rich study career with a wide array of opportunities to study what you love. Aside from working in a lab, many biologists find themselves in other closely related fields, such as agriculture, food processing, pharmaceutical manufacturing, health care, research and development (R&D) and more.

Thanks & Regards
Khushpreet Kaur
