

STATEMENT OF PURPOSE:

Having developed a keen interest in emerging technologies around me, I have always been curious about science behind engineering. I **Pushkar Kumar** belong to Haryana, India; have always been an obedient student throughout my academics. As far as my academic journey is concerned I did my matriculation in year 2011 and senior secondary in 2013, both from central board of secondary education. After that pursuing my field of interest I graduated in bachelors of Technology (Mechanical Engineering). To add additional feather in my cap I decided on studying in the United States for my master's

I am going to study in **Gannon University** which is a well-established, private university that is highly ranked & globally known. Their commitment to diversity is reflected in community, the academic offerings, & the commitment to an educational experience without boundaries. The university is dedicated to excellence in teaching, scholarship & service. The faculty & staff will help me to be prepared globally through programs grounded according to my preference. This university offers me a comprehensive, values-centered learning experience that emphasizes faith, leadership, inclusiveness & social responsibility. The student faculty ratio is 14:1 that will give me an opportunity to have one-on-one interactions with the professors to ask questions. Going to a university like Gannon will prepare me to start a new career & live a life full of possibilities of employment in my home country.

Master of Business Administration is a two year degree program which focusing on business administration and it covers various area of business administration accounting, business ethics, strategy, new management tools, techniques and knowledge in managing the workforce of the organization. It enhances my communication skills and leadership skills. After completing MBA from Gannon University it will open a new career path for me in technology, finance, management, marketing or manufacturing, with greater responsibility, career advancement, and increased financial reward.

There are many reasons, of choosing USA. It's hardly a secret that top universities in the U.S. continue to maintain a strong presence among the best ranked education institutions in the world. It is understood that how well-funded and supported American universities are, but the country also focuses that its universities provide high academic standards and rigorous requirements that instill the students. As technology continues to innovate and change the way in which the information is delivered, universities in America are trying to keep in step with the rapid acceleration of ideas. The best thing I liked is that I will be able to get more access to web-based classes, utilizing computer-based tests, allocation to use different labs and resources, the universities are able to give me the latest and most modern classroom. Lastly, I would say that with these advanced capabilities and access to all kinds of resources, American universities keep the education up-to-date, with all of the gadgets and engaging

virtual experiences that this generation of students is already accustomed to. If I study in the U.S.A, I will find myself immediately introduced to new ways of studying, learning, researching, and taking tests.

Thanks & Regards

Pushkar Kumar
