

STATEMENT OF PURPOSE

I am Nishu, a resident of Punjab, India. I completed my Matriculation from the Punjab School Education Board in 2017. Further, I completed my Senior Secondary Education from the Central Board of Secondary Education in 2019. I completed a Bachelor of Arts from Government College for Girls, Panjab University in 2022. I even secured an overall 60 PTE score in the year 2023. With a lot of curiosity and brainstorming I have decided to pursue my studies from the USA.

There are many reasons for why I chose this nation for my further education; however one of the significant reasons is the innovation and study strategies of the nation. Depending on the qualities, interests, and objectives, U.S. colleges purposely shift their classroom teaching and guidance strategies applicable to your own area. Exposure to technology based learning makes students capable and better.

Top colleges in the U.S. have a solid presence among the best positioned schooling foundations on the planet. Somewhat this has to do with how much subsidize and upheld American colleges are, however it additionally has to do with the academic guidelines and thorough prerequisites that they root in their curriculum.

Having done a lot of research about the best education hub abroad I had searched about Australia, Canada, UK and USA, finalized the United States of America as my study destination for the ample benefits it offers. It has a strong value for education that is reflected in the country's outstanding colleges and universities and its academic excellence. The universities are internationally ranked with many strong programs in a variety of areas. American colleges and universities have a large degree of responsibility to teach students which can provide some challenging and unique

opportunities in which critical thinking and innovation both are highly encouraged. This country is a great choice for students like me who are self-motivated, goal-oriented and want to make the most. The support services for the international students are among the best in the world. The overseas students avail chances of interaction with other communities that assist them in building their knowledge and confidence which is vital for the world they would deal with later. This country provides international students with diverse, challenging and rewarding career options that make a real difference in people's lives. Nearly every university in the U.S. takes diversity to be one of their defining pillars.

Auburn University is very popular among international students. This University provides a high quality of education, scholarship, grounded interaction of knowledge and a completely safe environment. It prepares students with practical and theoretical elements in the job market today. The college not only offers scholarly development but an overall development of a person. The top-most faculty and lovely environment will help me come out better as a person. With students from around the globe I will get to find out about various cultures.

Throughout my education, profession, volunteer and personal experiences, I have been increasingly amazed with the sheer range of opinions and heartfelt political beliefs of the people I have interacted with, oftentimes underscoring the reality that while one person sees a particular viewpoint, and another adamantly sees a completely different perspective.

I have learned through personal experience how representing others through politics is a two-way mirror, a way to represent one group while also reflecting the unique needs and beliefs of others. Political Science is the only field that has or ever could bring me the greatest personal and professional satisfaction and I look forward with great eagerness to my future. After this degree I want

to work in a reputed Multinational company and I am sure this degree and university will provide me a prominent position in my career.

Yours Truly

Nishu
