All anomalies and abnormal pathological conditions are not appreciated on sonography due to technical limitation (few of the limitations are related to bowel gas pattern, patient respiratory pattern, patient position, body habitus, abdominal fat, fetal position, amount of liquor, twin gestation, false positive or false negative interpretations and inherent inaccuracies of sonography). This report (including obstetric scan as well) is an individual opinion and is not the final diagnosis. The sonography report must be correlated with patient's clinical condition and other laboratory/radiological tests before concluding final diagnosis. All fetal anomalies are not detected on sonography. Please inform us immediately in case of any abnormality or discrepancy in obstetric (and other) scans or in case of any typing/printing mistake or in case of suspicion of any pathology in scans reported as normal. This report is not valid for Medico-Legal purpose.
