

I am **Mehak** resident of **Kaithal, Haryana, India**. I completed my **Matriculation** from **Central School Education Board** in **2019**. Further I pursued my **Senior Secondary Education** from **Central School Education Board** in **2021**. I hold an overall **6.0 Band** in **IELTS** test.

There are several reasons that why I only selected this country for my further studies but one of the major reasons is the world leader status in terms of technology and study techniques. Over the past few years, the U.S. has dominated the globe in being the most popular university destination for students from all over the world. Depending upon the strengths, interests, and goals, U.S. universities deliberately shift their classroom structures and instruction methods to make learning engaging and, at the same time, relevant to your own domain. By giving students more access to web-based classes, utilizing computer-based tests, and allowing students to use different labs and resources, universities are able to give the latest and most modern classroom experience that Imagine. Through various workshops, English-language practice courses, orientations, and trainings, foreign students are given plenty of help to get them ready for their classes. It's hardly a secret that top universities in the U.S. continue to maintain a strong presence among the best ranked education institutions in the world. Partially this has to do with how well-funded and supported American universities are, but it also has to do with the high academic standards and rigorous requirements that they instil in their students.

After a deep research I have chosen to study at **New Haven University, USA**. The university has grown significantly over the past 15 years. It offers a proven, purposeful education, which, through professionally focused courses of study, equips students with the critical skills, knowledge, and experience essential for

meaningful careers and productive life. The culture of the varsity is a comprehensive, value centred learning experience emphasizing on faith, leadership, inclusiveness and personal development. I have chosen to pursue **BS in Computer Science concentration Cyber security**.

The tools and machines that mechanical engineers have designed throughout history have lightened our loads, improved our quality of life, and taken us from the far reaches of outer space to the inner workings of minuscule Nano-devices.

Once I am back to my home nation I will have a wide range of career opportunities to choose from. Due to high internet penetration, cyber security is one of the biggest needs of the world as cyber security threats are very dangerous to the country's security. This course will help me outshine and gain an upper hand in my field of expertise. A degree from your prestigious varsity will make me more competent in my field of expertise.

Yours truly

Mehak
