

I am Harjot Singh from India. I would like to introduce myself as an enthusiastic and cheerful person. I would like to inform you about my education qualification. I have completed my matriculation in 2017 from the central board of secondary education and then my senior secondary in 2019 from the same board. Now after some brief research I decided to get an international degree in the United States from Lincoln University.

Lincoln University aims to provide a superior, experientially-based education that fosters personal and professional development, promotes social justice, and encourages positive change in workplaces and communities. The university will particularly help me to understand assignments, prioritize assignments, develop learning plans, develop strong study habits, manage time, and communicate with professors, and more. It will help me in succeeding academically, intellectually, professionally, and personally. I will get a chance to be boldly educated & empower myself for success. I will be prepared to become a next-generation leader.

I was selected to do Bachelors' in Business Administration. A good BBA program will provide me a measurable increase in salary as compared to other degrees. The curriculum is focused on group discussions, projects, presentations, and industry visits. This academic path will prepare me for a vibrant career and also help me grow on a professional and personal level. I will be prepared to become successful in a constantly changing environment, offering the tools you need to keep growing and keep developing as a successful professional in the global business world. As a result, I will be prepared in terms of personality, develop confidence, and I will also learn to communicate well. I will be developed as a polished individual. Perhaps the most concerning issue looked at by the present generation is the absence of employment opportunities because of expanding financial flimsiness and the gig economy's approaching. So, this program will help me to leverage my portfolio for a better future.

The US boasts of some of the finest universities, a lot of which consistently rank in the world university rankings. American

institutions are also known to have high academic standards, follow rigorous practices to maintain quality, and are well-supported to be able to offer an excellent education to their students. The U.S. higher education system has lots to offer me. The program structure lays equal emphasis on building a strong theoretical base along with importance on practical, employment-related skills. Going to a university in the US is a great way to expand my knowledge, meet new people, experience new culture, and enjoy the new experience. U.S. universities welcome international students for pursuing higher education in the USA and offer a support system within the university that enables them to adjust their life comfortably in the U.S. Academic study and experience from a U.S. university has a very positive reputation in the international job market.

I can easily work on job roles such as Project Manager, Operations Manager, Human Resource Manager, Team Leader, etc. I can even work in the government sector on various job profiles. I know I have the determination, endurance, and enthusiasm needed in this fascinating and rewarding career.

**Regards,
Harjot singh**
