

Statement of the Purpose

I, Deepak, would like to introduce myself as a passionate, dedicated and dedicated person to work well. Regarding my education, I completed my matriculation from Haryana School Education Board in 2015 and completed my senior secondary education from the same board in 2017. After that, I started Bachelor of Computer Applications and got my degree from Kurukshetra University in 2022. As we all know the competition in India is very fierce. I realized that when it comes to a good job, there must be something attractive in my needs to find it, to overcome this challenge. That's why I decided to get an international certificate from the United States.

American College is known for its simplicity. Students studying with us are not limited to a strict curriculum. The U.S. higher education system has lots to offer every student. The structure of the program emphasizes both the establishment of a theoretical foundation and practical skills. The teaching is interactive and very business-like, emphasizing knowledge and skills. Also, health makes people good. In the social and social world, employers increase the value of graduates with international knowledge and education. Studying in America will help me learn a new language, appreciate other cultures, overcome the challenges of living in another country, and understand the world better. America has one of the best education systems in the world, with the best programs in all subjects.

After deciding on my education, I started looking for the best University to my interests and chose the University of Fairleigh Dickinson University. Fairleigh Dickinson University is a center of excellence for creating world citizens through international education. Every course at this school is designed to ensure that all knowledge and skills are useful to graduates and to equip students with the skills necessary for their future. It ensures that every part of students' learning has a purpose and brings them closer to achieving their career goals. Their excellent and rigorous curriculum, wonderful teachers, and appropriate facilities provided everything I needed to ensure my future success. Known for its international perspective, Dickinson University today offers more than 40 study abroad programs in 25 countries and 13 languages on six continents. FDU offers international students a unique, hands-on and

professional education. I decided to do an MBA. This academic journey will prepare me for a vibrant career and also help me grow professionally and personally. An MBA is generally considered a worthwhile investment for most people with a career in business, however, people pursue this level of education at different stages of their careers. I will be prepared to become successful in an ever-changing environment and offer the tools you need to sustain growth and develop as a successful professional in the global business world. The MBA gives students the knowledge and skills they need to succeed in the business world. An MBA will open the door to a world of opportunities and take your career up a few notches. Thanks to this, I will be prepared in terms of personality, develop self-confidence and also learn to communicate well. I will be developed as a polished individual.

After completing my masters I will come back to India as there will be plenty of opportunities where I can easily work as a health service manager, finance manager, marketing manager etc. I can even work in government sector in different job profiles. I know I have the determination, persistence and enthusiasm needed in this fascinating and rewarding career.

Regards

Deepak
