

I am Sapna Sharma from India. As far as my educational background I have completed my senior secondary in the year of 2012 from Central Board of Secondary Education. Further I have completed my Bachelor of Science in 2015 from Panjab University and then my Masters in Business Administration in Human Resources in the year 2017 from Punjabi University, Patiala. After My Post Graduation i have done a job in the Corporate sector but while working i found that i have lacking some skills to grow more professionally in my career. So now I decided to pursue MS Business Analytics with the concentration of Globa; supply chain management from University of New Haven, USA.

The university aims to provide a superior, experientially-based education that fosters personal and professional development, promotes social justice, and encourages positive change in workplaces and communities. The university will particularly help me to understand assignments, prioritize assignments, develop learning plans, develop strong study habits, manage time, and communicate with professors, and more. It will help me in succeeding academically, intellectually, professionally, and personally. The university provides support and encouragement to every student needed to stay in school to complete their education. By studying at this university I will get a chance to be boldly educated & empower myself for success. I will be prepared to become a next-generation leader.

The Master of Science in Business Analytics program integrates knowledge of business domains with extensive knowledge of data management, machine learning, predictive analytics, and data visualization. The broad and intensive curriculum across a range of business disciplines features the latest analytics methods of translating data into relevant information for decision-makers. The program emphasizes business data as a valuable asset and shows methods to turn data into actionable insights to enhance operational efficiency, customer value, and profitability. The program uses a hands-on approach with applications in traditional business areas as well as Internet enabled new mediums.

This course discusses the managerial activities required to provide the right product or service in the right quantity ,with the right quality from the right source at the right time for the right price, through the use of global supply chains. The course focuses on contemporary strategic issues that affect both large and small corporations. Topics include key supply chain metrics, basic tools for supply chain management, procurement and outsourcing decisions, supplier selection and relationship management, logistics, and supply chain integration and coordination for the highest customer service.

The US boasts of some of the finest universities, a lot of which consistently rank in the world university rankings. American institutions are also known to have high academic standards, follow rigorous practices to maintain quality, and are well-supported to be able to offer an excellent education to their students. The U.S. higher education system has lots to offer me. The program structure lays equal emphasis on building a strong theoretical base along with importance on practical, employment-related skills. Going to a university in the US is a great way to expand my knowledge, meet new people, experience new culture, and enjoy the new experience. U.S. universities welcome international students for pursuing higher education in the USA and offer a support system within the university that enables

them to adjust their life comfortably in the U.S. Academic study and experience from a U.S. university has a very positive reputation in the international job market.

Regards,

Sapna Sharma.
