

My name is **Komaldeep Kaur**, I belong to **Delhi, India**. I did my **matriculation in the Central board of Secondary Application 2016**. Further, I completed my **senior Secondary** also from **the same Board in 2018**. I have always been inclined toward learning the new disciplines of business and its various attributes related to science. To understand the mechanism of markets and their business models. I did a Bachelor's **of Commerce** from **university of Delhi** in **2022**. To further quench my thirst of gaining the desired business acumen for success, I am now keen to gain an MBA degree at your esteemed University. As I decided to gain an MBA degree my research led me to your MBA program particularly.

I decided to pursue this program in the USA as we know their advancement in every domain, especially business models. There are few other countries that can provide the same level of advanced education, but the chances of landing in an outstanding internship program attracted me. It will give me a chance to connect with global markets and ventures. With an impressive international student community, I will get cultural exposure and diversity. The webinars, workshops, training and language workshops make it a good learning experience for students. Also the universities allow you to work in a good learning experience for students. Also the universities allow you to work on campus which makes it easy to support students financially. The research opportunities along with programs make it a unique learning experience. The American education system not only provides you with the best education, it also helps you enhance your overall personality and skills. Its main goal is to provide you skills that will help you stand out in international market

I chose Saint Leo University because of its unique educational approach and distinguished education programs. Another reason is this university has one of the talented faculty and equally motivated peers. The university is dedicated to cultivating a dedicated and welcoming atmosphere for students. They have a student-centered comprehensive program which emphasizes excellence in professional education. Their inclusivity of diversity within faculty, staff and students make it a unique experience. Since learning a Business course is needed through a functional approach, experimental teaching projects and case studies moved me to consider the university. The curriculum is comprehensive, value centered learning experience emphasizing on faith, leadership, inclusiveness and personal development. I have chosen to pursue a Master's in Business Administration from Saint Leo.

Through my bachelor's I would love to compute various data and accounts. It would further get me excited about how businesses could make higher profits if they knew to integrate various aspects of science and mathematics. Thus I knew I had to explore this area more and involve deeper into the world of Business dynamics to find answers to my questions. I knew I was ready to take the next step which is pursuing an MBA degree. My reason to choose Saint Leo was that it is one of the finest institutes for studies in Business Models. Besides, I am particularly impressed with your study model and would love to be given the opportunity to learn via this model.

I hope studying from your prestigious college will help me with the skills and knowledge that are required to develop a professional career. I hope you will consider my application and get me admitted.

Thanks and Regards,

Komaldeep Kaur
