

Q Why this course?

Ans It is a sector that combines the study of both electrical engineering with computer science. It will cover multiple sectors including electronics and computers. There will always be an opportunity to learn and update my skills. Moreover, the skills and quality required to be a computer engineer will be covered under this program including designing, developing systems and even working with robotics and AI.

Q Future goal?

Ans With the completion of my bachelor's degree from USA. I will return ~~back~~ to my home country and plan for master's. My long term plan is to work as a computer engineer in one of the top IT firms in my home nation.

Q Gap justification?

Ans I completed my senior secondary in 2023. After ~~that~~ which to apply for US studies I started my research for various ~~as~~ available ~~usa~~ universities for my preferred course. Meanwhile I appear for an English proficiency test and scored ~~600~~ band overall in the exam. I even explore my course curriculum. My application procedure took some time and I received my ~~220~~
