

STATEMENT OF PURPOSE

I **Jashanpreet Singh Mann** belong to Punjab, India. I have completed Matriculation in 2021 from Central Board of Secondary Education and my Senior Secondary in the year 2023 from the same Board. As I want to get employed at a managerial post, I decided to gain Higher Education from **United States of America**.

I chose **USA** because the universities offer a support system within the university which enables international students to adjust their life comfortably in the U.S. Other than academics, U.S. universities have a positive reputation in the international job market. I'll be lucky to study with the scholars in my field. These reasons attracted me towards this country. I am sure that I will become more confident and more knowledgeable

I searched about various universities but selected **California State University, Bakersfield**. The University provides a practical and theoretical knowledge to their students. Their faculty and staff prepare the students through different facilities and programs with advance techniques. The university has a low student-faculty ratio, so I can be able to get an individual attention which will make me more confident in my area of interest. University is known for its Business Programs, so after acquiring a business degree, I can get my desired job at a good post back in my hometown.

Bachelor of Business Administration and Management is a program which will equip me with the sufficient knowledge of Management and organising things in a better way. Adding a BBA degree to my profile will open up doors of growth for me in the Business World. I will be able to increase my management, critical thinking and analytical skills. The degree will have a direct positive impact on my career ahead.

I hope my application will be considered to get admitted at this prestigious university.

Regards

Jashanpreet Singh Mann
