

## **Statement of purpose**

I would like to introduce myself as Gurwinder Singh. I am writing to express my intent to pursue in Master of Business Administration at Saint Leo University for Fall 2025 intake. During my undergraduate studies in Bachelor of Science I developed a deep interest in courses such as mathematics and computer science. I often found myself drawn to the intersection of technology and business. While studying on a project to develop a software solution for a local startup, I was intrigued not only by the technical challenges but also by how business strategy influenced our project's direction and success. This experience sparked my decision to pursue an MBA, where I can combine my technical expertise with strategic business skills.

I have completed my secondary education in 2014 from Punjab school of educational board. After my secondary school I completed my Bachelor of Science from Kurukshetra University Kurukshetra. I explored a wide range of subjects that provided me with a strong foundation in agricultural sciences. Courses such as Biochemistry -it bridges biology and chemistry, focusing on the structure, function, and interactions of biomolecules like proteins, carbohydrates, lipids, and nucleic acids. Biochemistry helps us understand cellular processes, metabolism, genetics, and molecular biology, providing insights into health, disease mechanisms, and biotechnology applications. Soil Science and Fertility Management- it focuses on soil classification, nutrient management, and sustainable practices like crop rotation and organic fertilization to maintain soil health, support plant growth, and optimize resource use for sustainable farming. Crop Botany studies the structure, growth, development, and reproduction of crop plants. It focuses on plant physiology, morphology, and genetics to improve crop yield, disease resistance, and adaptation to environmental conditions for sustainable agriculture.

Saint Leo University's Master of Business Administration as an ideal choice for advancing my academic and professional goals due to its, renowned faculty, and focus on research and practical experience. I am pursuing an MBA to bridge the gap between my Science studies and business strategy. These skills and problem-solving abilities I developed during my B.Sc. are valuable, but I recognize that a deeper understanding of business principles, finance, and management is essential for driving impactful solutions in today's competitive landscape. The MBA will provide me with the strategic mindset and leadership skills necessary to advance in my career and achieve my goal of leading technology-driven projects and teams.

The MBA program at Saint leo University has strong focus on innovation and entrepreneurship, which aligns perfectly with my career goals. The program's curriculum, including courses like Strategic Management and Data-Driven Decision Making, is particularly appealing to me. Additionally, the opportunity to engage with a diverse and learn from esteemed faculty will greatly enrich my learning experience. I am excited about contributing my technical background and fresh perspectives to class discussions and group projects.

To pursue my readiness for Master's-level coursework and communication in an English-speaking academic environment, I completed the Duolingo examination, achieving a score of overall 120. This score not only meets but exceeds the English proficiency requirements for the Master of Business Administration at Saint leo University underscoring my capability to engage effectively with the program's curriculum. I am confident that my English skills will support my success in the program and my overall academic and professional growth.

I am enthusiastic about the opportunity to join Saint leo University and contribute to its vibrant academic community. My background in computer science, combined with the business acumen I will gain from the MBA, will enable me to tackle complex challenges and drive successful outcomes. I am committed to making the most of this program and look forward to contributing to and growing within the University.
