*Simran
Kaur*

From a young age, I have been captivated by machines and their vital role in our modern world. The workings and the innovative designs of electrical systems have always amused me, fueling my curiosity and desire to learn more. After completing my senior secondary education in 2022, I recognized the importance of deepening my understanding of this field. To enhance my knowledge of electrical engineering, I took the initiative to explore fundamental concepts independently. I engaged in various school projects and created models, which provided me with a foundational understanding of basic engineering principles. While these experiences were invaluable, I soon realized that they only scratched the surface of my curiosity. I am eager to grasp the underlying logic and phenomena that govern the functioning of machines. This desire for a deeper understanding led me to pursue a Bachelor's degree in electrical Engineering in the United States for the present intake.
