

Statement of purpose

I am Karan veer singh Resident of Uttar Pradesh , India. In terms of my academic history, I received my secondary education from the Central Board of secondary Education Board in 2011 and my senior secondary education from the same board in 2013. After that I completed my bachelor's in 2018 from the INSTITUTE OF HOTEL MANAGEMENT CATERING AND NUTRITION Affiliated to Indira Gandhi National open University. Now I've made the decision to finish my studies in the US. Because the USA is a top destination for higher education worldwide and because I had always wanted to study there, I decided to apply for my Master's degree there.

The United States of America is an amazing country that is well-known for its excellent educational and scientific systems. Most international students opt to complete their postsecondary studies at American universities. The system of education is flexible and dynamic. US universities provide excellent programs across all subject areas, and they have an extremely astounding selection of degrees to choose from. Students also have the chance to collaborate with and pick up knowledge from highly accomplished and competent researchers in the subject. It also gives practical abilities and work-related activities more weight. Universities not only set the bar for science and technology, but also offer a plethora of recreational, cultural, and educational options that help students connect with one another and develop a sense of global citizenship.

After much investigation, I've determined that Alliant International University in the United States is my dream university. Alliant International University appears to be a reputable university offering top-notch practice-based learning in a tough, innovative environment. Upon researching classes and universities, Lincoln University was the clear winner. What first brought me here was the smaller class sizes compared to other colleges, which facilitate better learning and professor-student interaction. I believe that if research programs and case studies are included in the curriculum, students will find it easier to understand how statistics are used in various industries. Additionally, networking opportunities with local, national, and international organizations are abundant at the university. Students perceive the multicultural community on campus as pleasant and welcoming. I believe that learning in this environment will help me in more ways than only developing my skill sets and turning me into a professional specialist. The MBA program at Alliant International University has strong focus on innovation and entrepreneurship, which aligns perfectly with my career goals. The program's curriculum, including courses like Strategic Management and Data-Driven Decision Making, is particularly appealing to me. Additionally, the opportunity to engage with a diverse and learn from esteemed faculty will greatly enrich my learning experience. I am excited about contributing my technical background and fresh perspectives to class discussions and group projects. I am enthusiastic about the opportunity to join Alliant International University and contribute to its vibrant academic community. My background in Management, combined with the business acumen I will gain from the MBA, will enable me to tackle complex challenges and drive successful outcomes. I am committed to making the most of this program and look forward to contributing to and growing within the University.

Regards

Karan Veer Singh
