

Statement of Purpose

Introduction:-

I would like to introduce myself as Bhupinder Singh, from Punjab , India native. Regarding my academic background, I have completed my Secondary Education in 2022 from the Punjab School Education Board and passed my senior secondary in 2024 from Central Board of secondary Education. To achieve a better career option in my home country I decided to get a international degree from the United States. since it is a top destination for higher education globally.

Why I choose USA:-

The United States of America is an amazing country that is well-known for its excellent educational and scientific systems. Most international students opt to complete their postsecondary studies at American universities. The system of education is flexible and dynamic. US universities provide excellent programs across all subject areas, and they have an extremely astounding selection of degrees to choose from. Students also have the chance to collaborate with and pick up knowledge from highly accomplished and competent researchers in the subject. It also gives practical abilities and work-related activities more weight. Universities not only set the standard in science and technology but also offer a plethora of recreational, cultural, and educational possibilities that help students form relationships and develop a sense of global citizenship.

Why This University:-

I've done a lot of research and have come to the conclusion that Lincoln University in the US is my ideal university. Lincoln University seems to be a respectable institution that provides excellent practice-based learning in a demanding, cutting-edge setting. After looking into courses and colleges, Lincoln University emerged as the top choice. The smaller class sizes here than at other universities are what initially drew me in, as they promote better learning and student-teacher connection. Furthermore, the university offers a plethora of networking opportunities with regional, national, and worldwide organizations. The multicultural community on campus is seen by students as friendly and inviting. I think that learning in this setting will benefit me in more ways than just enhancing my abilities and making me a professional expert.

Why this course:-

I decided to pursue a Bachelor of Science in Diagnostic at Lincoln University after completing my studies because of the school's dedication to Human Anatomy, Physics of Diagnostic Radiology, Physiology and Pathology, General Physics, Radiography Equipment, Radiation Physics, X-Ray, and other subjects. These studies will be enlightening and transformative, which will fuel my desire to help improve patient care and diagnostic techniques. My long-term professional aspirations include working as a hospital administrator, dental assistant, or customer service technician after receiving my international degree. My learning style and goals are well matched with the chance to work with cutting-edge technology and take part in practical laboratory work.

I'm also intrigued by Lincoln University's cutting-edge research projects, especially those that focus on fields like laboratory diagnostics and medical imaging. I am excited to investigate new technologies that improve diagnostic efficiency and accuracy as well as contribute to ongoing research projects. I am confident that the abilities I acquire from this school will enable me to significantly advance the diagnostic sciences.

Goal:-

After completing my bachelors I will come back to my home country and My objective is to become a skilled diagnostic practitioner who advances the area through research in addition to practicing clinically. I am excited about the chance to contribute to the advancement of diagnostic sciences and be a member of Lincoln University's thriving academic community.
