### TO WHOM IT MAY CONCERN

It gives me great pleasure to write this recommendation for **Ms. Deepa Rani**, who has been known to me for the last seven years. Over the previous years (2015-2017), I taught her subjects like 'Classical Mechanics' and 'Digital electronics,' and I got to know her closely through these interactions. The first impression **Deepa Rani** lands on anybody is of a perfect student with an ideal amalgamation of personality & sound knowledge of her subjects. With this, I would keep her among her class's top most performing students. She has always been an attentive, active, sincere & punctual student in the class and in life. Her extraordinary ways of analyzing the problem from different perspectives make her stand out in the crowd.

Her enthusiasm to learn more & more is reflected well in her grades. I have witnessed her work efficiency, inquisitiveness regarding various findings, and critical thinking abilities. She also has excellent communication skills and can work under all circumstances. She is a fast learner who has the ability to use her skills in all the sectors possible. Apart from class, her participation in various departmental and university-level events is always noticeable. She is a rare student who relishes everything she does and brings glory.

On a personal level, **Deepa Rani** is a well-disciplined & industrious student with a pleasant personality. I fully expect her to be as excellent & productive a student at your university as she was in my class. Overall, she is a fantastic person with enormous capabilities. I strongly recommend her for higher studies at your university. I am delighted to be writing this recommendation and wish for her success in her further studies.

### LETTER OF RECOMMENDATION

I understand Ms. **Deepa Rani** (M.Sc. Physics) is desirous of seeking admission to higher studies in your university.

The singular point that impressed me about Ms. **Deepa Rani** is her high level of commitment and passion in her area of interest. In short she has a highly analytical mind and excels in solving problems her contemporaries find difficult. Ms. Deepa Rani has always been keen on expanding her horizons, and is one of the few people I have come across to whom the process of accruing knowledge- rather than the end result is a reward in itself. She has a highly developed sense of responsibility, though not always to her advantage. For example she held important posts in college technical festivals in the third and fourth semester and took them very seriously, though there were no tangible benefits attached to them. On many occasions she put her responsibilities above her personal goals and shortchanged herself in the process. I highly admire the fact that, she did not confine her interest to academics and excelled in a wide range of, cultural and social activities as well. She has a natural flair for organization and possesses excellent leadership skills. In spite of all her qualities, she treats everyone with the degree of respect and deference they expect and therefore she makes a great team player and above all a good human being. If provided with the right kind of guidance and opportunity, she is destined to make a mark on the global stage. I feel it is in a more personalized academic environment she will be able to realize her true potential, and therefore I recommend her in no uncertain terms for admission to the program in your School/University. For further information please feel free to contact me at my reference address.
