

Statement of purpose

I would like to introduce myself as Suman Rani. I am writing to express my intent to pursue Bachelor of Science in Diagnostic at Lincoln University for Fall 2025 intake. I am eager to pursue a Bachelor of Science in Diagnostic. My fascination with the human body and its complexities, combined with my interest in technology and patient care, has driven me toward a career in diagnostic healthcare.

I have completed my secondary education from HBSE Board at 2011. After that I have also completed Diploma in General Nursing Midwifery (GNM) from Haryana Nursing Registration Council at 2015. From a young age, I have been captivated by Nursing. My high school coursework allowed me to delve into subjects like Fundamental Nursing, Medical Surgical Nursing, Mental Health, Community Health etc. where I developed a keen interest in understanding diseases and their underlying mechanisms. These experiences were further enriched by hands-on laboratory work, where I learned to appreciate the critical role diagnostics play in patient management and treatment.

After Completed my studies I choose Bachelor of Science in Diagnostic at Lincoln University because my decision to pursue this program at Lincoln University is motivated by the university's commitment to Human Anatomy, Physics of Diagnostic Radiology, Physiology and Pathology, General Physics, Radiography Equipment, Radiation Physics, X-Ray etc. these studies will inspiring and transformative, driving my desire to contribute to advancements in diagnostic methods and patient care.

After holding the International Degree My long-term career goal is such as becoming a Hospital Administrator, Staff Nurse, Dental Assistant, Customer Service Technician. The opportunity to engage with state-of-the-art technology and participate in hands-on laboratory work aligns perfectly with my learning style and aspirations.

Additionally, I am interested in the innovative research initiatives at Lincoln University, particularly in areas such as medical imaging and laboratory diagnostics. I am eager to contribute to ongoing research projects and explore new technologies that enhance diagnostic accuracy and efficiency. I believe that the skills I develop through this program will empower me to make meaningful contributions to the field of diagnostic sciences.

My goal is to become a proficient diagnostic professional who not only excels in clinical practice but also engages in research to advance the field. I am looking forward to the opportunity to be a part of Lincoln University's vibrant academic community and to contribute to the future of diagnostic sciences.
