

STATEMENT OF PURPOSE

I **Samarpreet Singh** from India have completed Matriculation in 2023 from Central Board of Secondary Education and my Senior Secondary in the year 2025 from the same board. As I want to get employed at a managerial post, I decided to acquire Bachelor Degree from US.

I chose **United States of America** because the universities offer a support system within the university which enables international students to adjust their life comfortably in the US other than academics, US universities has a positive reputation in the international job market. I'll be lucky to study with the scholars in my field. I am sure that I will become more confident and more knowledgeable. These reasons attracted me towards this country.

I searched about various universities but selected **Lincoln University, California** as it provides a practical and theoretical knowledge to their students. Their faculty and staff prepare the students through different facilities and programs with advance techniques. The university has a low student-faculty ratio, so I will be getting an individual attention which will make me more confident in my area of interest. LU is known for its Business Programs, so after acquiring a business degree, I can get my desired job at a good post back in my hometown.

Bachelor of Business Administration is a program which will equip me with the sufficient knowledge Management and Organising things in a better way. Adding a BBA degree to my profile will open up doors of growth for me in the business world. I will be able to increase my management, critical thinking and analytical skills. The degree will have a direct positive impact on my career ahead.

I hope my application will be considered to get admitted at your prestigious university.

REGARDS

SAMARPREET SINGH
